

Smart Community Access

Connected.
Reliable. Secure.

A smarter way to secure and manage your community's access points

Your community is a busy place – residents and guests coming and going, daily package deliveries and service repair visits. When you incorporate LiftMaster® Access Control Systems powered by myQ®, you get a scalable smart access management solution that enhances security and reduces liability, while providing residents with a safe, modern living experience they desire.

Always know exactly who is coming/going and remotely manage community access with a unified solution that provides convenience and peace of mind for you and your residents.

Maximize efficiency and improve operations

Streamline your access management.

myQ® Community Control is a cloud-based platform that lets you conveniently manage and control multiple access points across all communities in your portfolio from a single dashboard. With 24/7 monitoring capabilities and real-time activity alerts, you'll know instantly if a suspended code is being used or there is a nuisance at the entrance.

Maximize efficiency

Perform updates from anywhere

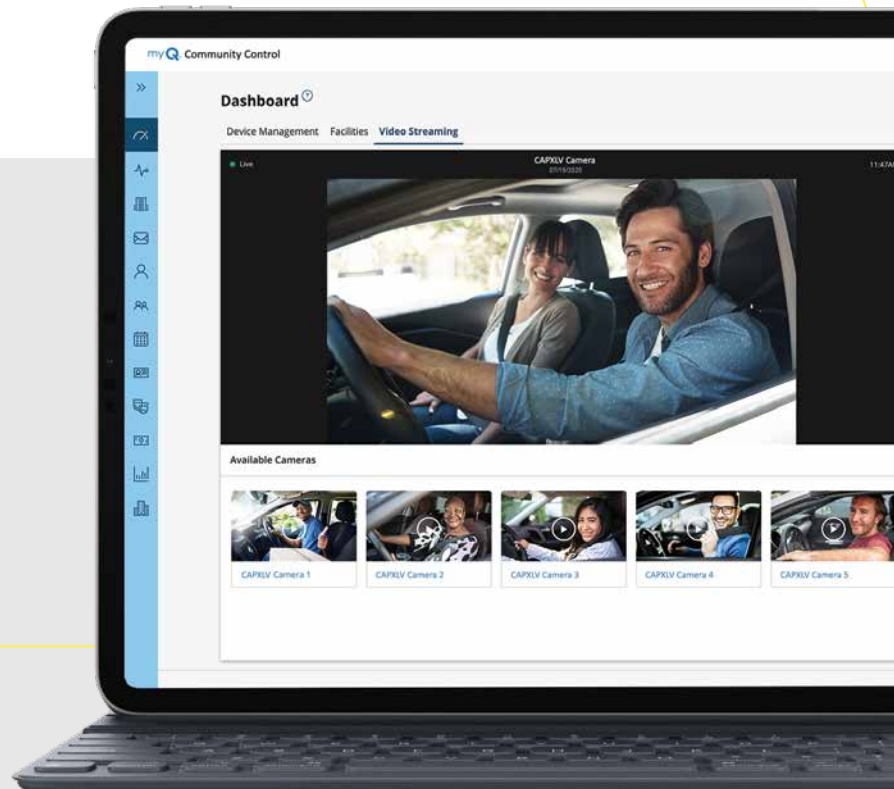

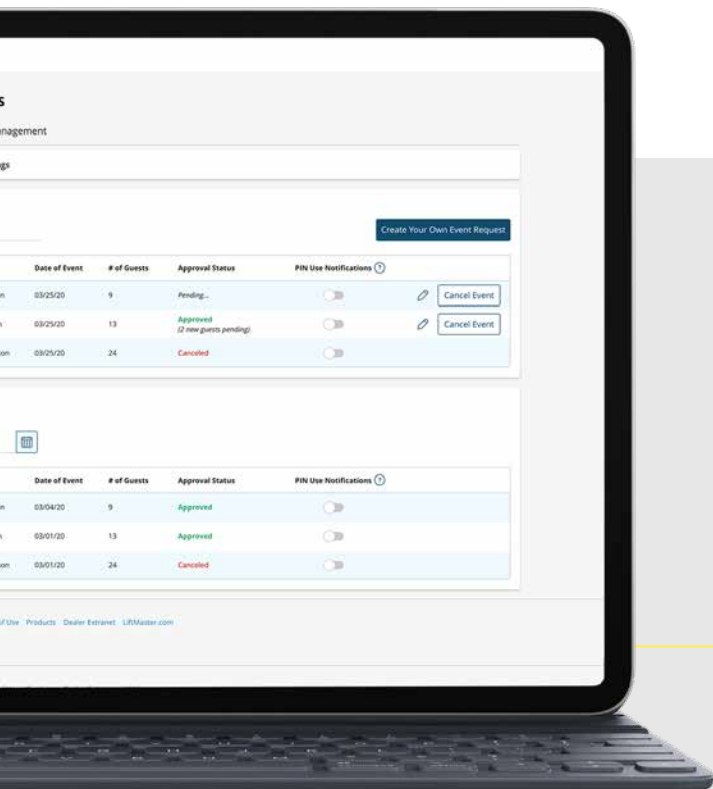

Streamline operations

Robust people management

Easily add/delete residents, assign access to specific entrances, set holiday/multiple schedules, approve guest/event requests and more for improved resident security and traffic flow.

Video history

Playback and download stored video clips corresponding to access events.

Enhance your security.

Securely oversee how and when residents and visitors can access each entrance across every community you manage with myQ Community Control. Plus, real-time notifications and remote diagnostics give you the ability to detect and address issues before your residents are even aware.

Access with a view.

Through myQ Community Control, you can benefit from visual insight over all your CAPXLV-connected access points. Live video streaming and recorded events provide you with clear traceability around property damage, vandalism and other common nuisances.

Make guest management a standout resident amenity

Provide visual confirmation and control with the Community by myQ® app.

Give your residents the ability to manage property access from their smartphone. Through the app's one-way video calling and two-way voice communication, residents can safely identify guests and confidently grant/deny access from anywhere.

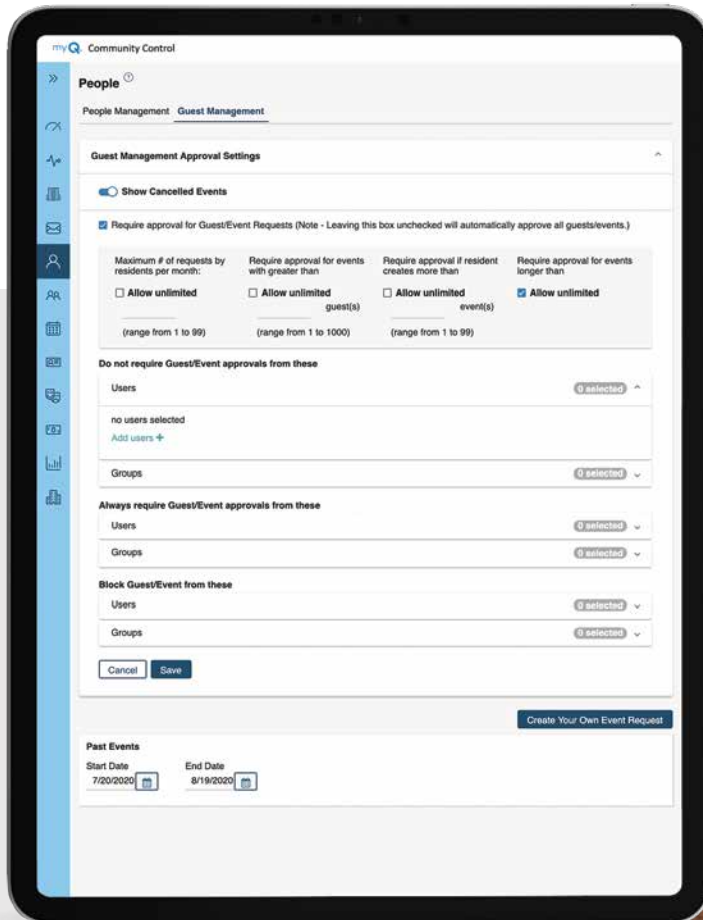

Seeing is believing

Let residents verify who is at an entrance before granting access.

**Guest
verification**

**Retail
package
delivery**

**Food
delivery**

Empower residents with myQ Community Control guest management features.

Take the hassle out of guest management and let residents safely schedule and control when their guests come and go through the guest management web page. Residents can easily set up guest lists for one-time, multi-day or reoccurring events and ensures that guests will receive a trackable entry code vs. a resident's personal code.

Planned access events

Let residents schedule access for designated guests and events.

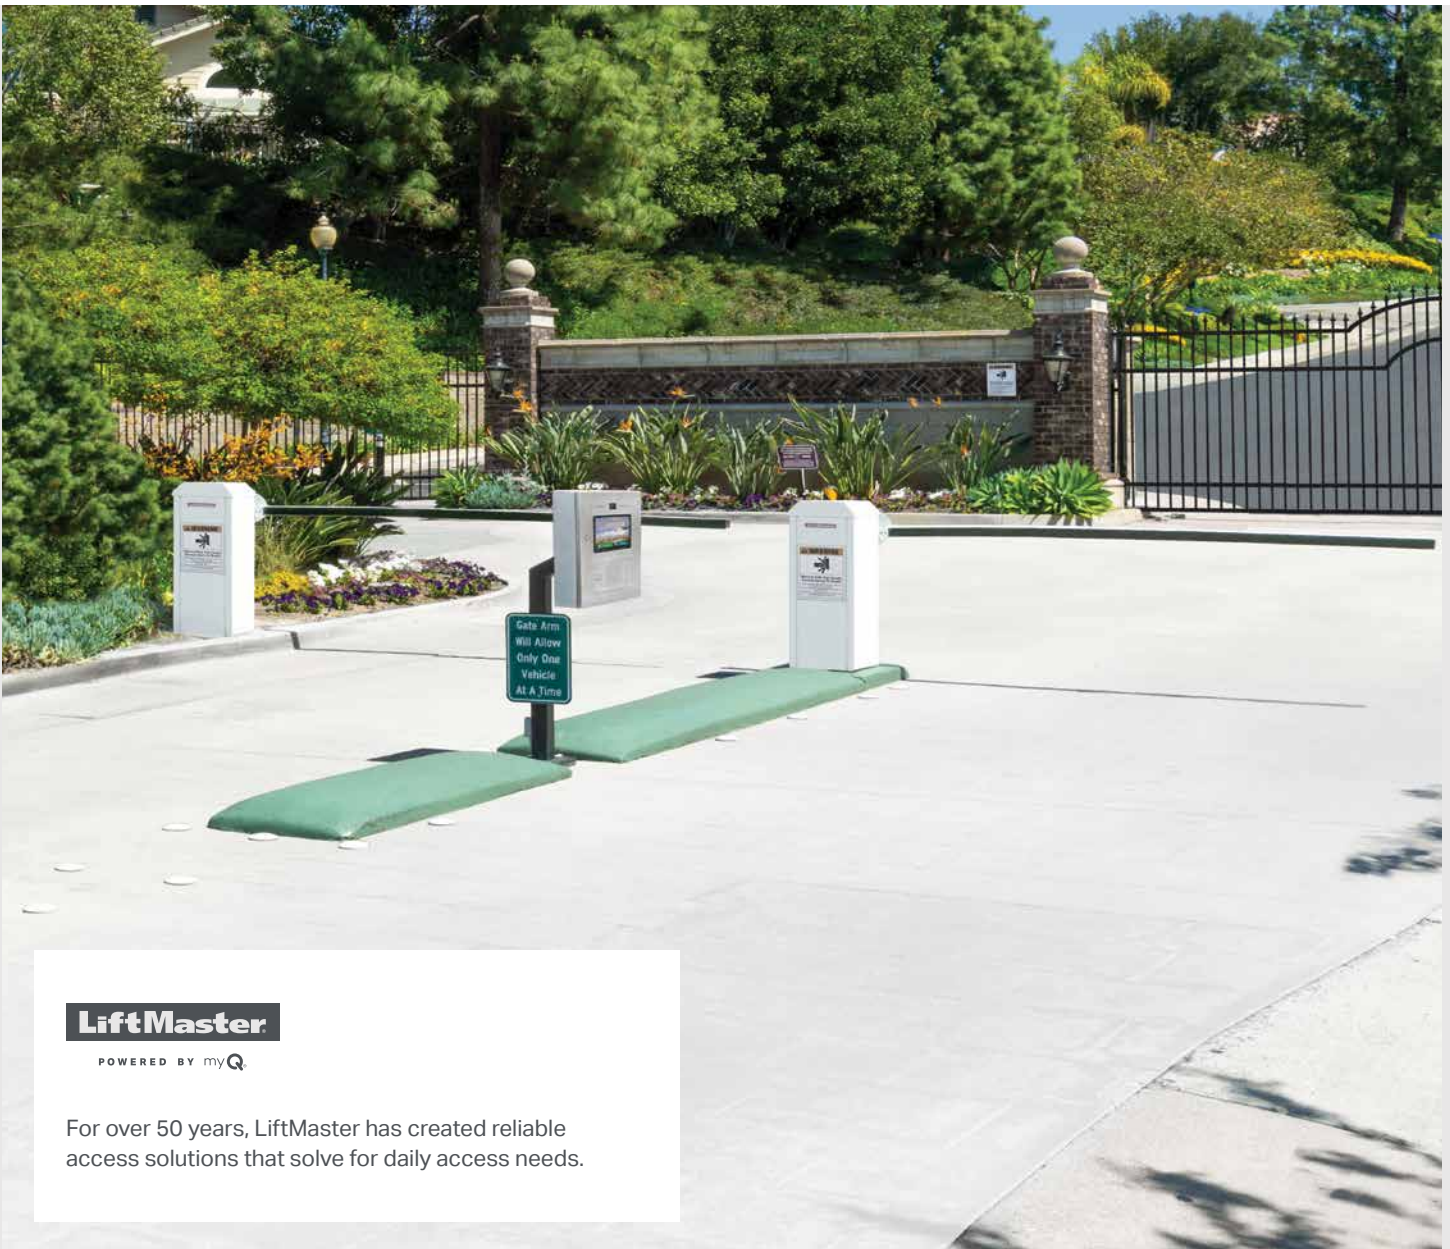

Family and friends

Contractors, dog walkers and more

Party guests

Build a standout access experience

LiftMaster®'s powerful combinations of innovative myQ® technology and reliable hardware seamlessly connect community access points for a complete view of multiple entrances across multiple properties. From entry systems to keypads, card readers and event access notifications, our lineup of feature-rich options provides the perfect experience in access control to meet your needs.

**LiftMaster**

POWERED BY myQ®

For over 50 years, LiftMaster has created reliable access solutions that solve for daily access needs.

New

CAPXLV

Connected Access Portal, High Capacity with Video

Make a great first impression with the CAPXLV, a resident facing smart access system. CAPXLV provides a scalable cloud-based solution to control multiple entry points including vehicular gates and residential buildings.

- ▶ Control up to 4 gates and/or doors from a single system
- ▶ Integrated camera provides live-streaming and records access events
- ▶ Cloud-based security and access management control
- ▶ Intuitive, high-definition interface
- ▶ Robust diagnostic capabilities
- ▶ Expansive capacity (up to 50,000 users)

CAP2D

Connected Access Portal, 2-Door Controller

A behind the scenes powerhouse, the CAP2D provides a scalable cloud-based solution to easily manage and control access for resident only and community amenity access points.

- ▶ Controls up to 2 gates and/or doors
- ▶ Cloud-based security
- ▶ Robust diagnostic capabilities
- ▶ Universal compatibility
- ▶ Expansive capacity (up to 25,000 users)

Subscriptions and storage

Software Subscription

Elevate your access control with a subscription to myQ Community Control, a powerful property management platform that lets you remotely manage access points with live-streaming video, real-time notifications and remote diagnostics.

Additional Video Storage

Increase your video storage capabilities to 30 days so you can easily playback and download stored video clips for clear traceability around property damage, vandalism and other nuisances.

Resident App Video Licenses

Invest in video licenses and let residents verify guests and grant access with the Community by myQ app. Provides an opportunity to modernize the overall resident experience.

Make access safety a priority for your community

Committed to the highest standards of product safety, LiftMaster® garage door and gate operators maintain one of the best safety records in the industry. Select from LiftMaster's full line of gate operators, safety accessories and garage door openers, for customizable solutions compatible with CAPXLV and designed to meet any type of access need.

CAPXLCAM **Video Camera Kit for CAPXL**

Communities that currently have CAPXL systems can easily add all of the video functionality of the CAPXLV with this USB kit.

LMSC1000 **RFID Long Range Reader**

When paired with LiftMaster hang and vehicle tags, this proprietary system operates seamlessly with the CAPXLV and CAP2D to keep traffic moving in your community.

KPR2000 **Wired Keypad and Proximity Reader**

Ideal for secondary access points like gym and pool entrances.

Passport Remote Controls **Visor and Keychain Remotes with Unique Credentialed IDs**

Offer residents a traceable single solution to access gate, garage and other community entry points.

HDSW24UL / CSW24UL **Swing Gate Operator**

Continuously move gates, providing automated entry for all types of communities. Pair with CAPXLV for remote system diagnostics.

HDSL24UL / CSL24UL **Slide Gate Operator**

Ideal for high-traffic applications, providing automated entry for all types of communities. Pair with CAPXLV for remote system diagnostics.

HCTDCUL **Specialty Overhead Operator**

The high traffic operator of choice for parking garages in multifamily residential applications; ultra-quiet smooth operation is engineered to reduce wear and tear on the operator, helping to extend the life of the system and increase uptime.

85503 **Secure View™ Garage Opener**

The most feature-rich LiftMaster residential garage door opener to date. Includes integrated video camera providing a live feed and recorded events. Also includes smartphone control and battery backup. Separate app required.

LMRRUL **Monitored Retro-Reflective Photo Eye**

Provides long-range sensing distance up to 50 ft.; requires power only on one side of the installation; meets UL 325 safety standards.

S505AL **5 ft. Small Profile Resistive Edge**

Installation is fast and easy; mounts vertically or horizontally; meets UL 325 safety standards. Compatible with Wireless Edge Kit and Transmitter.

LMWEKITU **Monitored Wireless Edge Kit**

Protects up to 8 entrapment points; receiver accepts up to 4 transmitters; meets UL 325 safety standards.

LMWETXU **Monitored Wireless Edge Transmitter**

Provides sensing distance up to 130 ft.; two year battery life; meets UL 325 safety standards.
